

HS PAC Chair Chat

Volume 1, Issue 7, August 2007

CAPT John Cardarelli II

Good News! We continue to meet the minimum readiness target of 80% for the PHS. This month I want to focus on the readiness statistics within our Category. The charts below may indicate if there are any outliers among our disciplines, ranks, professions, or agencies that may suggest difficulties with becoming basic ready? I didn't see any significant outliers. I hope this information will motivate you and others to meet and continue to meet basic readiness standards by the next check (30 September 2007). We can significantly improve our category percentage if 96 officers address the one item missing from their records. Over the next few months, we will make an effort to contact every officer not meeting readiness standards to help them attain this goal.

Reasons why our officers are not meeting basic readiness

REASON	#
Missing Immunization	39
Missing BLS	23
Missing Licensure	14
Missing APFT/Presidents Challenge	11
Medical Exam	9
*Three or more reasons from above	44
*Two reasons for not meeting readiness	23
Total	163

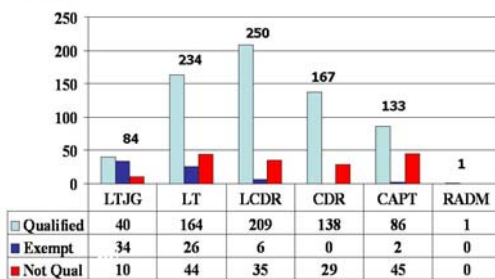

* More than one reason

Quick Notes

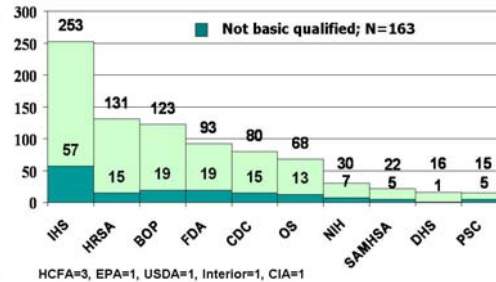

1. Congratulations to the 45 HS Officers that made [Permanent Promotion](#).
2. The CPO and "State of the Category" [presentations](#) are available on our website. Check them out!
3. CAPT Wyeth has moved from the Chair of the Clinical FAC to the Chair of the Applied Public Health FAC. CAPT Curtis Farrar is our newest representative on the Clinical FAC.
4. RADM Milner is planning his travel for next year – and you are included! He is getting numerous requests and attending various HHS functions. He may be coming to your city and wants to meet you! We may reach out to you to help organize logistics, escorts, etc. and make his travel even more productive.
